

Air Products Polymers Announces Price Increases for Several Polymer Emulsions Products

LEHIGH VALLEY, Pa. (June 11, 2007) – Air Products Polymers, L.P. today announced that, effective July 1, 2007, it will implement a \$0.025 per wet pound price increase for all vinyl acetate homopolymer and copolymer, vinyl acetate ethylene copolymer, vinyl acetate vinyl chloride copolymer and vinyl acrylic based emulsions. These products are sold by the company under the Airflex®, Flexbond®, and Vinac® trademarks. This price adjustment, applicable to all North American sales, reflects rising prices and tight supply for a wide range of raw materials.

Air Products Polymers' Airflex, Flexbond, and Vinac emulsion products are used in applications including adhesives, building products, nonwovens, paper, carpet and textiles.

Air Products Polymers, L.P. is a joint venture between Air Products and Chemicals, Inc. (Allentown, Pa., NYSE:APD) and Wacker-Chemie GmbH (Munich, Germany) that manufactures and distributes latex polymers.

***NOTE: This release may contain forward-looking statements. Actual results could vary materially, due to changes in current expectations.
