

June 2, 2021

Dear Valued Channel Partner,

This letter is to provide notification that Raw materials used in the manufacture of adhesives, continue to see significant price movements. As a result, Henkel's North America Packaging & Consumer businesses is forced to adjust our pricing for:

- APC (Formerly known as the Packaging Steering Units) All hot melt products will increase by 7%-8%.
- APL (Formerly known as the Construction Steering Unit) All technologies will increase by 11%.
- APP (Formerly known as the Paper Converting Steering Unit) All hot melt products will increase by 7%-8%.

These new prices are effective July 12th, 2021.

Henkel works diligently to negotiate favorable and stable prices from our raw material suppliers. However, market conditions have made it impossible to maintain current pricing levels.

Your Henkel Sales Representative will be in contact with you, to answer any specific questions that you may have. We remain grateful for your business, and your continued support.

Sincerely,

Gary P. Rzonca

Gary P Rzonca
Vice President – Packaging North America and Latin America
